International Collaboration has been the theme for the IGILUC from its first edition and this year, we will underpin the need for collaboration and cooperation in implanting cancer control strategies, exchange of experience on cancers & networking with colleagues from around the world, collaborating with international societies and high caliber international experts to make cancer history; the driving force behind this collaboration is the shared mission of the organizations and scientists to advance progress against cancer.

Gastrointestinal cancers and the accessory organs of digestion (pancreas, liver, gall bladder) are responsible for more cancers and more deaths from cancer than any other system in the body. There is significant geographic variation in the rates of different gastrointestinal cancers.

Liver tumors has the fastest growing death rate of all cancers in the world so we need discussion of the prospects in the context of the most recent international trends and initiatives for the treatment.

Urological Tumors include cancers of the bladder, kidney, prostate and testicles, all relatively common. Prostate cancer, for example, is the most common cancer in men. multimodal team for the surgery, radiation and chemo therapy as well as the post treatment long-term follow-up care is required for research professional that need to gather in a challenge for future eradication of cancer.

Conference's Scientific Program is designed to provide state-of-the-art Information on GU and GI topics, issues; offering breakthrough advances and insight in scientific and clinical research, patient management and practice through an outstanding range of scientific and educational symposia, special sessions, teaching lectures, workshops, debates and much more. A comprehensive, stimulating and highly-educational scientific experience is guaranteed for all.

President, IGILUC Conference
President, Egyptian Society of Interventional Radiology (EgSIR)

Welcome Message

Dear Colleagues, Distinguished Guests, and Esteemed Experts, It is my great honor and privilege to welcome you all to IGILUC 2026, organized this year under the umbrella of the Egyptian Society of Interventional Radiology (EgSIR). As President of both IGILUC and EgSIR, I am truly proud to witness the remarkable growth of this conference into one of the largest and most influential interventional radiology meetings in Egypt and the entire Middle East.

This year marks a significant milestone in our journey. We are delighted to launch a new and historic collaboration with two major international societies:

- The Chinese Society of Interventional Radiology, represented by its esteemed President, Prof. Gao-Jun Teng, who joins us as a distinguished speaker.
- The Saudi Society of Interventional Radiology, represented by its President, Dr. Hassan Alshehri, who also honors us with his participation.

These partnerships reflect our shared vision to strengthen bridges between global IR communities, promote scientific exchange, and advance patient care across regions. IGILUC 2026 features an exceptional scientific program covering the latest breakthroughs in thyroid, lymphatic, MSK, vascular, oncologic, and minimally invasive interventions. With world-renowned experts joining us from leading institutions across the United States, Europe, Asia, and the Middle East, we are confident that this year's meeting will set new benchmarks for education, innovation, and collaboration.

I extend my deepest gratitude to all Experts, faculty, sponsors, and attendees for being part of this important event. Your continued commitment and contributions are what make IGILUC a truly unique and impactful platform.

I wish you all a productive, inspiring, and memorable experience.

Welcome to IGILUC 2026.

Welcome to Cairo.

Welcome to the future of Interventional Radiology.

Warm regards,

*Uniting Knowledge,

12 Reasons to Attend the 12th IGILUC 2026

01. The Latest Breakthroughs in Thyroid Interventions
02. Lymphatic Interventions: From Essentials to Advanced Mastery
03. Genicular Artery Embolization & MSK Innovations Led by Global Experts
04. Prostatic Artery Embolization: How Far We've Come — and Where We're Going
05. Portal Hypertension: Techniques, Tips, and Real-Case Debates
06. Venous Interventions: Comprehensive Coverage from Head to Toe
07. HCC Management: Cutting-Edge Updates from International Leaders
08. Metastatic Liver Disease: Current Evidence & Evolving Strategies
09. Genitourinary IR: Diverse Diseases, Smarter Techniques
10. Pulmonary Embolism: Defining the IR Role in Life-Saving Care
11. Renal Interventions: A Clear Look at Where We Stand Today
12. Exclusive Masterclasses, Hands-On Training & Multidisciplinary Tumor Board Sessions

MASRI GENOMICS & PERCISION MEDICINE COURSE

Theme:-

The MASRI Genomics and Precision Medicine course is designed to advance clinical competence by highlighting the pivotal role of genomics and bioinformatics in modern medical diagnostics. The course integrates key applications of genomic technologies in precision oncology, rare genetic disease diagnosis, and pathogen discovery, emphasizing their translation into routine clinical and laboratory practice.

Session III: Round Table Discussion

Metagenomics and Beyond: Genomic Approaches to Pathogen Discovery

Overview:

This round table session will explore how genomic technologies are transforming pathogen discovery, outbreak investigation, and precision public health. The discussion will bridge research, diagnostics, and public health implementation, with a focus on emerging infections, antimicrobial resistance, and One Health approaches.

Moderator

Prof. Sara Agwa

Prof. Mohamed Saadawy

Panelists (Alphabetically):

Prof. Abdallah Samy	Head Of One Health Unit MASRI.
Prof. Ahmed Ramadan Sofy	Professor of Virology, Dean Faculty of Science. Institute of Global Health, AUC.
Dr. Ayat Mamdouh	National Professional Officer (Laboratories), WHO.
Prof. Maha Ahmed	Consultant of Virology & Head of Viral Zoonotic Disease, Research Program.
Prof. Mayar Said	Head of Biodefence center of infectious and emerging diseases.
Prof. Mohamed Saadawy	Head of Central Labs, MOH.
Prof. Nancy El Gendy	Head Of Virology Labs, MOH.
Prof. Shaimaa Shawky	National Professional Officer (Laboratories), WHO.
Prof. Wallaa Khater	

Session Key Points:

- Next-Generation Sequencing (NGS) in Pathogen Discovery.
- Metagenomics in Unknown and Emerging Infections.
- Genomic Surveillance and Outbreak Investigation.
- A- One Health and Zoonotic Pathogen Discovery.
- Bioinformatics and Artificial Intelligence.
- Antimicrobial Resistance (AMR) Genomics.
